

Job Title: Web Developer
Department: Web / IT
Report to: Production Director

About Us

Established in 2003, Media 10 is the most awarded media and events company in the UK and have a growing portfolio of 30 live events covering design, interiors, lifestyle, and construction. As well as Media 10 being specialists in the events sector, the company's creative flare produces well established publications and owns a series of award-winning magazines and websites.

We not only enjoy what we do, we love it! We are passionate about delivering the very best results in everything we do and expect our team members to have the same passion.

What is expected of you

You are a skilled web developer who will join our team of innovative designers, who consistently enhance the user experience of our websites.

The ideal candidate will have exceptional organizational skills, experience in managing workflows, is a skilled coder with extensive technical expertise to maintain and update our existing websites.

Working knowledge of web applications, programming languages, and web services such as APIs, CSS, CSS3, cross-browser compatibility, HTML, HTML5, JavaScript, JQuery, PHP, Joomla, security principles, REST, SOAP, content management systems including WordPress, Drupal, and web user interface design (UI) is essential to succeed in this role.

The Role

- Create well-designed, tested code using best practices for website development, including mobile and responsive site design
- Create websites and user interfaces, using standard HTML/CSS practices, while incorporating data from back-end databases and services
- Testing all browsers and devices to ensure various computers can access content
- Maintain updated knowledge of new and emerging industry trends and technology
- Work with the marketing teams to answer/ help and create forms, pages or any other requirements
- Maintain CMS updates, advert updates, analytics, digital magazines and anything digital for the web.
- Meet regularly with management/editorial/marketing teams to understand requirements and determine project scopes and specifications
- Ensure software stability, support quality assurance, and perform unit and user-acceptance testing to identify bugs and ensure production operations run successfully
- Work quickly and carefully to complete small edits, develop plans for completing larger projects, collaborate with colleagues, and suggest new solutions to improve existing websites
- Create reusable templates, wireframes for web pages and email templates; manage maintenance, updates, expansions, and scaling of each design
- Perform regular file backups to local directories for recovery
- Check tickets system

What you are good at

- Dedication to innovative, sophisticated designs and collaborative problem solving
- Working experience in Apple, Windows and Linux environments
- Proven success in a project coordination role
- Experience implementing and using modern web development workflows and operations, using a variety of tools
- Experience in servers, hosting, domain names, scripts
- Excellent communication skills both verbal and written
- Good interpersonal skills
- Good team player/member
- Ability to work independently and interact regularly with the wider finance team but also the commercial teams in the business
